

## Week 4

Reading about these new technologies is pretty exciting, its goes to show har far we've come. When reading this article I thought that there would be so many people overwhelmed by trying to adapt to this new lifestyle. However, all of these new technologies are designed to make your life easier. Even though it may not feel intuitive. I think it's amazing to see where we're headed and definitely makes me excited to see where we'll be in the next couple years. For instance if they were able to improve quantum computing there would be so many benefits such as artificial intelligence, simulations, and etc. All these new technologies are so mind blowing! For your homework this week we are going to write a short paper 1/2-1 page on your thoughts

As for relational databases, I thought using MySql was pretty interesting. I thought the walkthrough you provided was pretty easy, i'm excited to see how we could apply this to other applications. Im also excited to take a deeper dive and expand my understanding is relational databases!
